

Introducing Hurford Hardwood Cladding

Hardwood Cladding is more and more being specified in high end designs due to its ability to integrate the exterior of a building with the natural environment. Be it a home or a commercial application, the clean lines of Hurford Hardwood Cladding in either a horizontal or vertical application has great aesthetic appeal.

Hurford Hardwood Cladding is manufactured from durable Australian Hardwoods, Spotted Gum, Stringybark and Durable Reds. The Cladding is straight-line processed*, which enables easy installation to ensure that straight clean lines are achieved.

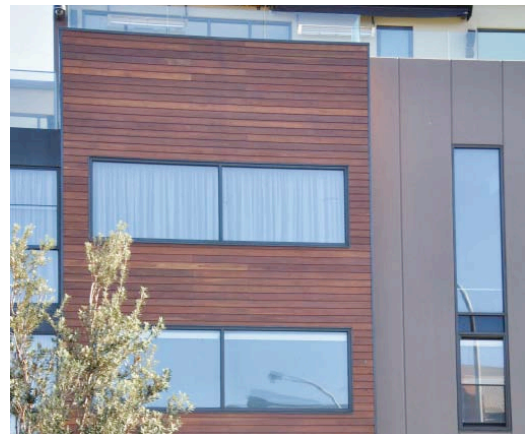

Hurford Hardwood Cladding is machined to ensure it meets the Australian Standard for design in both horizontal & vertical application and is available in two cover widths - 165mm & 115mm.

PROFILE DRAWING
